

System Settings

- The **Postmaster E-mail Address** MUST BE on a domain that the system currently delivers email for and the **Admin E-mail Address** SHOULD BE an email address for a domain that Hermes SEG does NOT deliver email for. Even though the system will allow you to enter an Admin E-mail Address for a domain that Hermes SEG deliver email for, it's not recommended. The **Admin E-mail Address** should be an external to the system e-mail address.
- The system will automatically create virtual addresses for **postmaster**, **abuse** and **root** based on the **Postmaster E-mail Address** you set. For example, if your Postmaster E-mail Address is **postmaster@domain.tld** and your Admin E-mail Address is **someone@otherdomain.tld**, the system will automatically create the following virtual address:
 - **postmaster@domain.tld** ---> **someone@otherdomain.tld**
- The system will also create the following two virtual addresses and related mappings based on the postmaster e-mail address domain part:
 - **abuse@domain.tld** ---> **someone@otherdomain.tld**
 - **root@domain.tld** ---> **someone@otherdomain.tld**
- The virtual address the system creates can be viewed under **Gateway** ---> **Virtual Recipients**.
- Adding a Serial Number is not required. However, if you are going to add a Serial Number, ensure Hermes SEG has access to the Internet over ports **TCP/80** and **TCP/443**. Serial Numbers are validated over the Internet with our activation service).
- If you have a Serial Number, click the **Add Serial Number** button and in the resultant window enter it in the **Serial Number** field, check the license convert checkbox and click the **Submit** button (**Figure 1**).

Cancel

- In the **Postmaster E-mail Address** field enter the email address you want to use
- In the **Admin E-mail Address** field enter the email address you want to use
- In the **TimeZone** field, set your local timezone by deleting the default **America/New_York** and start typing the name of your continent. The system will automatically display a drop-down with all the relevant timezones for your continent (**Figure 2**).

- If you have activated a Hermes SEG Pro Serial Number, the **Daily Update Check** field will be available for you to **Enable/Disable**. If you enable the **Daily Update Check**, the system will automatically check for Hermes SEG updates on a daily basis and if it finds one, it will send an e-mail to the postmaster E-mail Address you set above.
- In the **Telemetry** field, set to **Enabled** (By default it's enabled) if you wish to allow the sending of anonymized data to our servers in order to improve Hermes SEG and our services. **Rest assured, that we do NOT share or sell this data and it's strictly used for internal purposes.** Please see the list below for the data we collect:

- Hermes SEG unique system ID
- The total number of Internal Recipients (NOT the actual internal recipients)
- The total number of Domains (NOT the actual domains)
- The total number of Virtual Recipients (NOT the actual virtual recipients)
- Hermes SEG version
- Hermes SEG build
- Hermes SEG timezone
- Hermes SEG edition
- Whether or not you use the internal build-in certificate for the Console or SMTP (NOT the actual certificate)
- The total number of Clean messages (NOT the actual messages)
- The total number of Spam messages (NOT the actual messages)
- The total number of Virus messages (NOT the actual messages)
- Your IP address (ONLY used to determine your Geo location)

- Click the **Submit** button to save your changes (**Figure 3**).

Figure 3

The screenshot shows the 'System Settings' page with a breadcrumb 'Home / System Settings' in the top right. A blue button labeled 'Add Serial Number' is at the top left. Below are several settings sections: 'Postmaster E-mail Address' with the value 'postmaster@deeztek.net'; 'Admin E-mail Address' with 'dedwards@deeztek.net'; 'TimeZone' with 'America/New_York'; 'Serial Number' with 'pnb4YgNrDEsoVkemc2hq'; 'Daily Update Check' with a dropdown menu set to 'Enable (Recommended)'; and 'Telemetry' with a yellow warning banner and a dropdown menu also set to 'Enable (Recommended)'. A blue 'Submit' button is at the bottom left.
