

Initialize Pyzor

Pyzor is a collaborative, networked system to detect and block spam using digests of messages. Pyzor must be initialized before Hermes SEG can utilize it. Initialization of Pyzor should only have to be done once per system.

Click on the **Initialize Pyzor** button to initialize (**Figure 1**).

Figure 1

Initialize Pyzor

Pyzor must be initialized before it can be used. Click the button below to initialize Pyzor.

A screenshot of a web interface showing a button labeled "Initialize Pyzor". The button is a simple rectangular button with a light gray background and a thin black border. It is centered horizontally within a white rectangular area. Above the button, there is a heading "Initialize Pyzor" in blue and a paragraph of text explaining that Pyzor must be initialized before it can be used and instructing the user to click the button below. Below the button, there is a horizontal line and a section titled "Revision #1" containing creation and update timestamps and the name "Dino Edwards".
