Configure Outlook with Deeztek Nextcloud CalDAV Calendar and Deeztek Hosted Mail Account

Pre-requisites: You must have an existing Deeztek Mail account

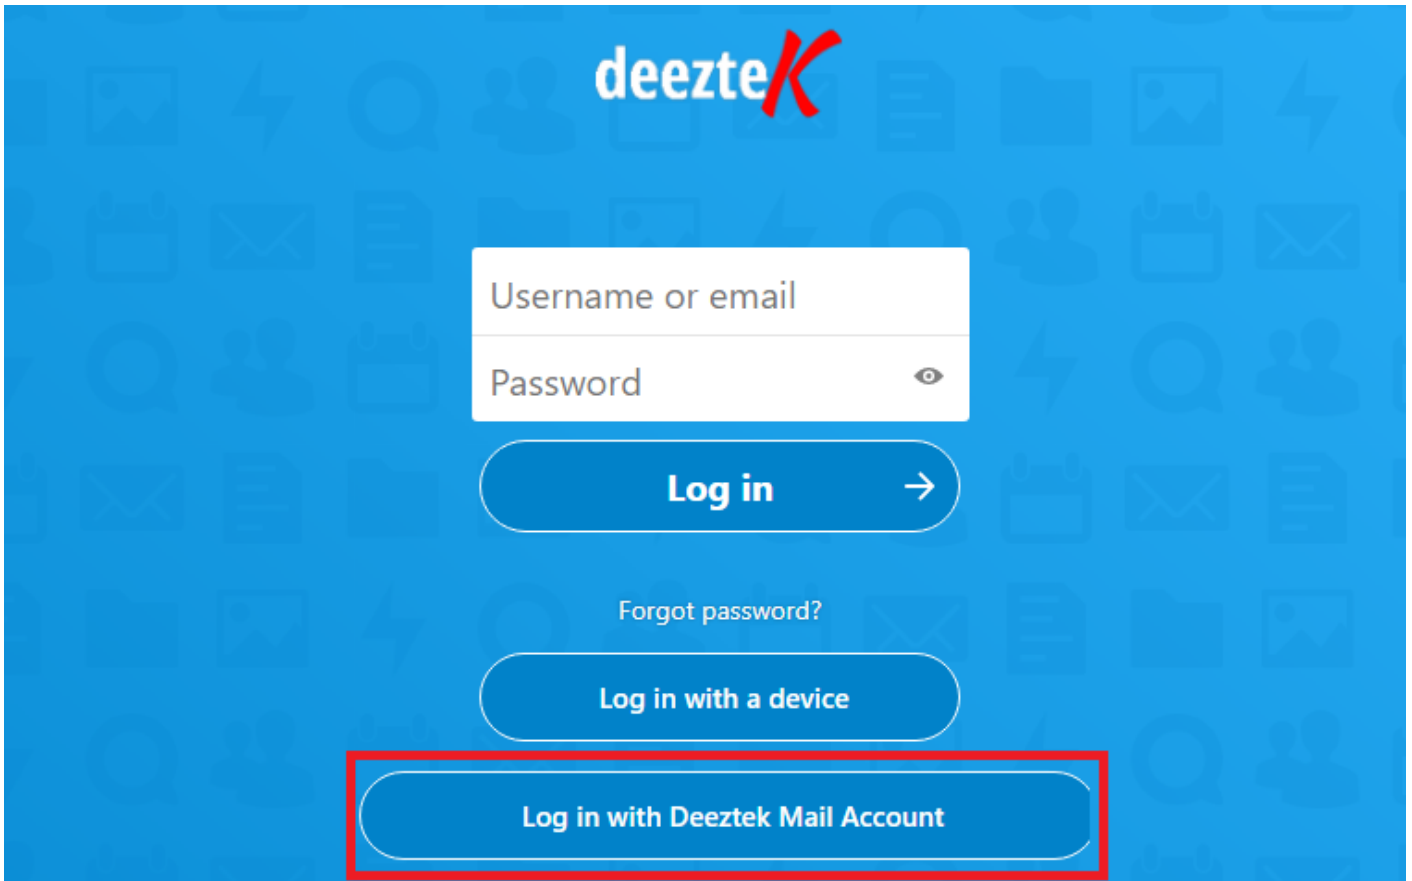

Download and install the latest version of CalDav Synchronizer

- Navigate to [CalDav Synchronizer](https://caldavsynchronizer.org/download-2/) page at <https://caldavsynchronizer.org/download-2/> and download the latest version of CalDav Synchronizer (As of the writing of this guide, the latest version was 4.0.0).
- Extract the downloaded zip and then install CalDav synchronizer using the included **setup.exe**.

Login to Deeztek Nextcloud with your Deeztek Mail Credentials

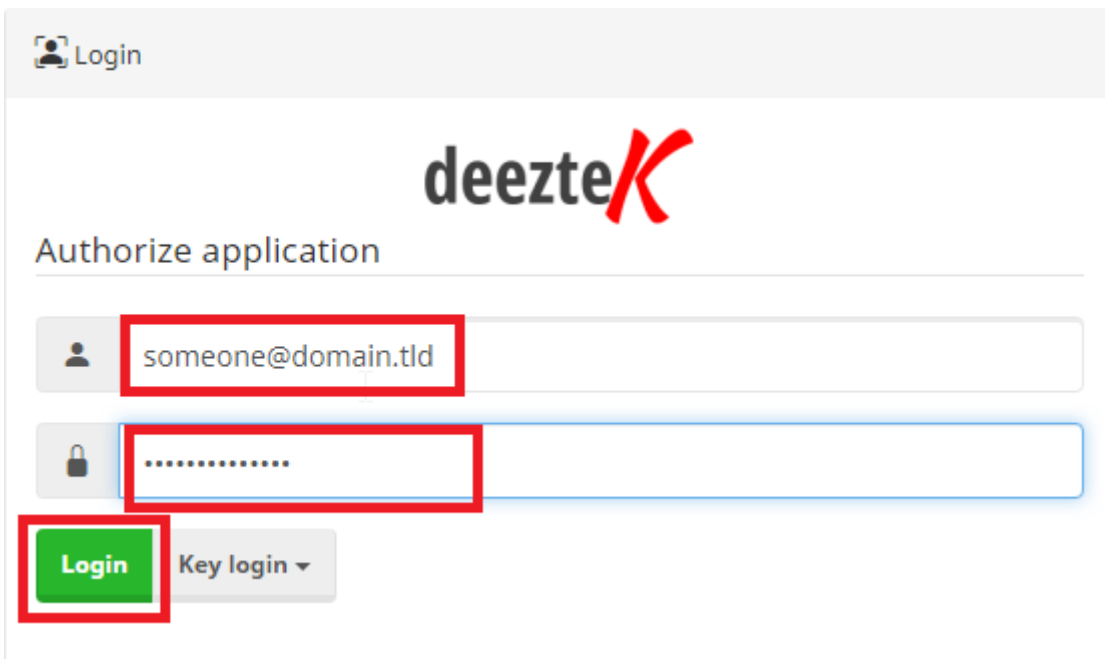

- Navigate to the Deeztek Nextcloud server at <https://cloud.hosting.deeztek.com> and click on the the **Login with Deeztek Mail Account** button (**Figure 1**):

Figure 1

- You will be taken to the Deeztek Mail **Authorize application** screen. Enter your Deeztek Mail username and password and click the **Login** button (**Figure 2**):

Figure 2

- On the following **Authorize application** screen, click the **Authorize application** button (**Figure 3**):

Figure 3

Authorize application

An application asked for the following permissions:

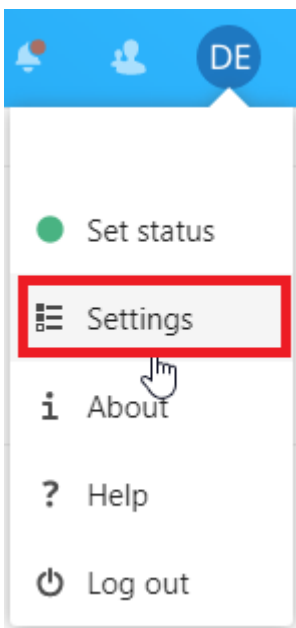

Profile View personal information: username, full name, created, modified, active

Authorize application

Deny

- Once you click the Authorize application button, you will be logged in to the Deeztek Nextcloud. On the top right menu, click on the round icon containing the initials of your name and then click on **Settings (Figure 4)**:

Figure 4

- Next, click on **Security** on the left menu (**Figure 5**):

Figure 5

- Under the **Devices & sessions** section, enter a name of your choosing in the **App name** field (Example: shared-calendar) and click the **Create new app password (Figure 6)**:

Figure 6

Two-Factor Authentication i

Use a second factor besides your password to increase security for your account.

If you use third party applications to connect to Nextcloud, please make sure to create and configure an app password for each before authentication.

 TOTP (Authenticator app)

Enable TOTP

 Backup code

[Generate backup codes](#)

Passwordless Authentication

Set up your account for passwordless authentication following the FIDO2 standard.

No devices configured.

[Add WebAuthn device](#)

Devices & sessions

Web, desktop and mobile clients currently logged in to your account.

Device	Last activity
 This session	seconds ago

[Create new app password](#)

- The system will generate a **Username** and **Password** below. Ensure you copy both the username and the password before clicking the **Done** button because you are going to need them in order to configure Outlook below (**Figure 7**):

Figure 7

Use the credentials below to configure your app or device. For security reasons this password will only be shown once.

Username

Password  [Done](#)

[Show QR code for mobile apps](#)

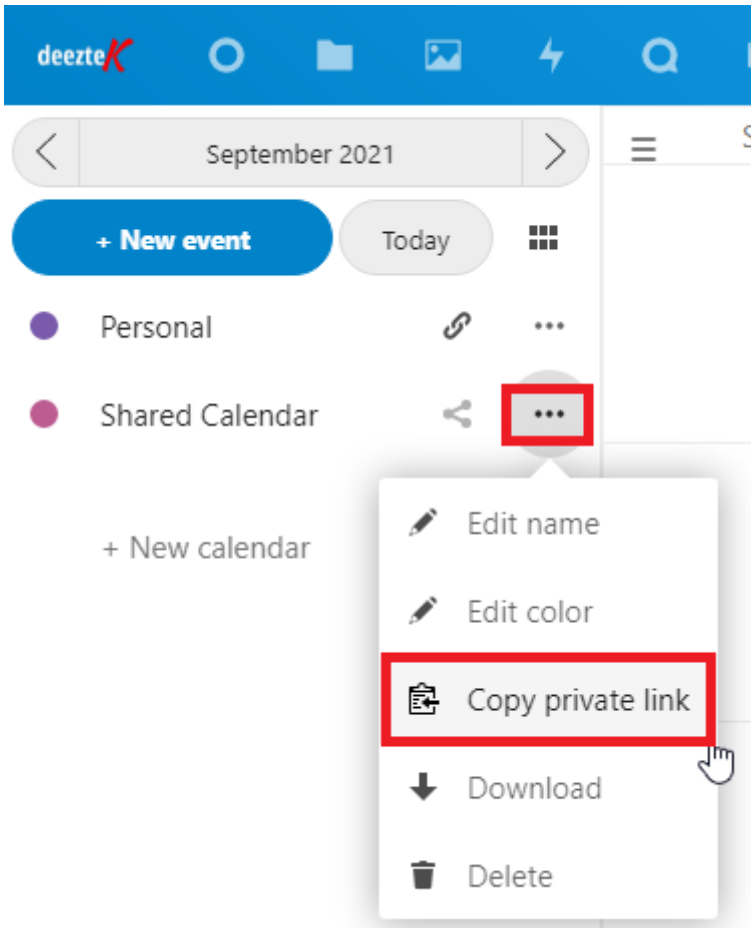

- Next, click on the **Calendar** icon on the top menu bar (**Figure 8**):

Figure 8

- Locate the calendar you wish to connect to and click the on the 3 dots ******* next to the calendar and on the resultant menu click on **Copy private link**, ensuring you save the link because you are going to need it to configure Outlook below (**Figure 9**):

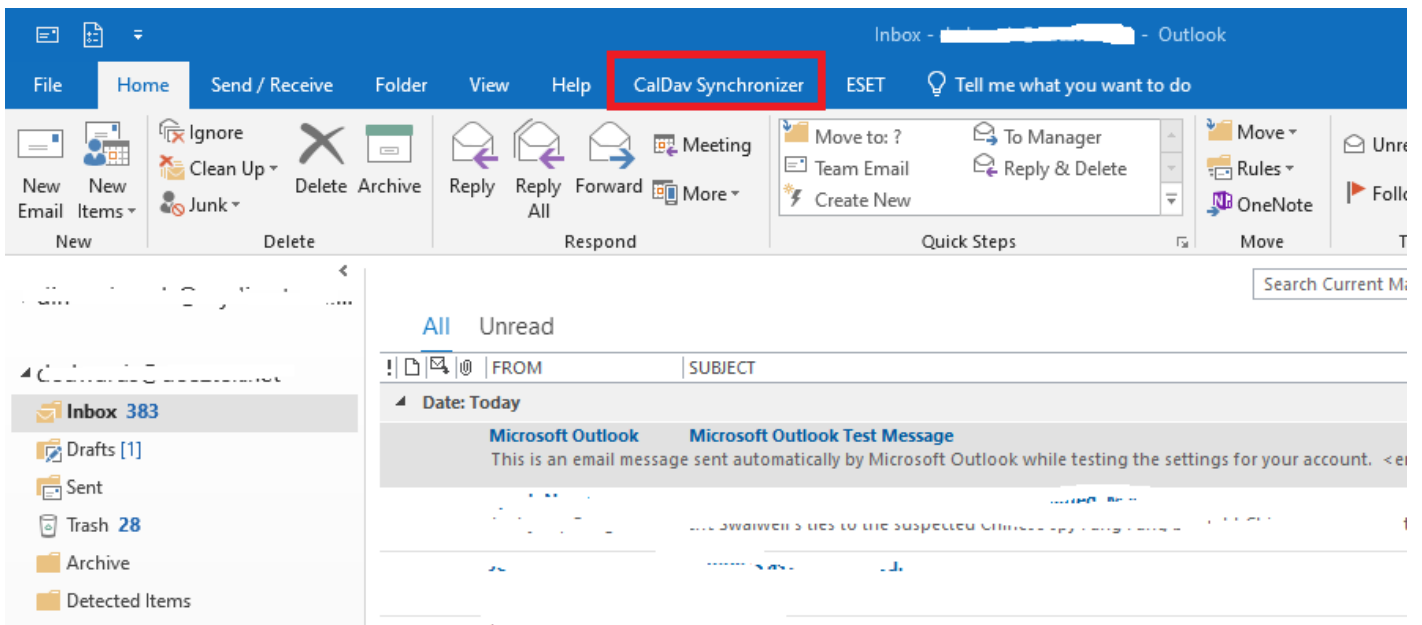

Figure 9

Configure CalDav Synchronizer

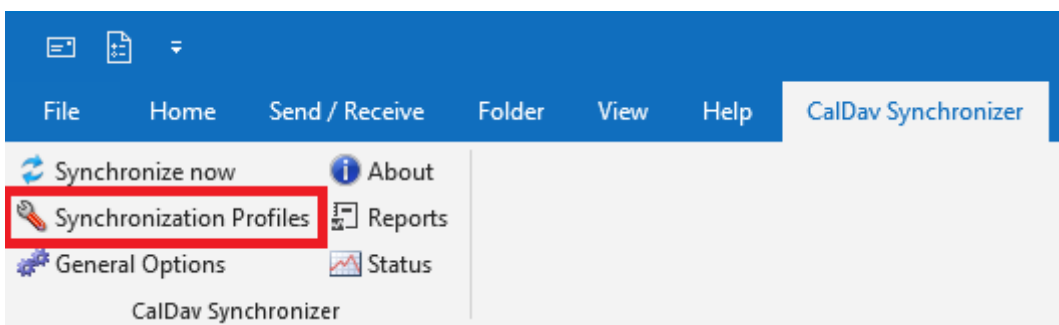

From the Outlook main window, click on **CalDav Synchronizer** from the top menu (**Figure 10**).

Figure 10

Next, click on **Synchronization Profiles** button (Figure 11).

Figure 11

In the CalDav **Options** window, click the **+** icon (Add new profile) button and in the **Select Profile Type** window, select **Nextcloud** and click **OK** (Figure 12).

Figure 12

- Back in the **Options** window, enter a name in the **Name** section (Example: Nextcloud) and then click on the  button in the **Outlook folder** section (**Figure 13**).

Figure 13

The image shows a screenshot of an Outlook settings dialog box. At the top, there is a window title bar with standard minimize, maximize, and close buttons. Below the title bar, the 'Name' field is set to 'Nextcloud' and is highlighted with a red rectangular box. Underneath, the 'Outlook Settings' section contains an 'Outlook folder' field with the value '<MISSING>' and a 'New...' button to its right, which is also highlighted with a red rectangular box. Below this is a checkbox labeled 'Synchronize items immediately after change' which is currently unchecked. The 'Server Settings' section follows, with fields for 'DAV URL' (containing 'https://server.example/nextcloud/remote.php/dav/'), 'Username', 'Password', and 'Email address'. A 'Test or discover settings' button is located below these fields. The 'Sync Settings' section at the bottom includes a 'Synchronization mode' dropdown menu set to 'Outlook ↔ Server (Two-Way)' and a 'Synchronization interval (minutes)' dropdown menu set to '30'. At the bottom left, there is a blue link that says 'Show Advanced Settings'. At the bottom right, there are 'OK' and 'Cancel' buttons. A mouse cursor is visible in the lower right area of the dialog.

- In the **Select folder** window, ensure you have selected the top-most folder of that contains your e-mail address and click the **New...** button (**Figure 14**):

Figure 14

- In the **Create New Folder** window, enter a name in the **Name** section (Example: Nextcloud-Calendar), in the **Folder contains** drop-down ensure you select **Calendar Items**, in the **Select where to place the folder** section, ensure you have selected the top-most folder containing your e-mail address and click the **OK** button (**Figure 15**):

Figure 15

- Back in the **Select Folder** window, ensure the newly created **Nextcloud-Calendar** (or whatever name you chose to name your calendar) is selected and click the **OK** button (**Figure 16**):

Figure 16

Back in the **Options** window, check the **Synchronize items immediately after change** checkbox, in the **DAV URL** field enter the Private Link you copied from **Figure 9** above, in the **Username** field paste the username you generated from **Figure 6** above, in the **Password** field paste the password you generated from **Figure 6** above, in the **Email address** field enter your e-mail address and click the **Test or Discover Settings (Figure 17)**:

[Show Advanced Settings](#)

- Back in the **Options** window, click the **OK** button on the bottom right (**Figure 19**):

Figure 19

- Restart Outlook

Access Deeztek Nextcloud with Deeztek Mail Credentials

- Navigate to Deeztek Mail at <https://mail.hosting.deeztek.com> and login with your mailbox username and password (**Figure 1**):

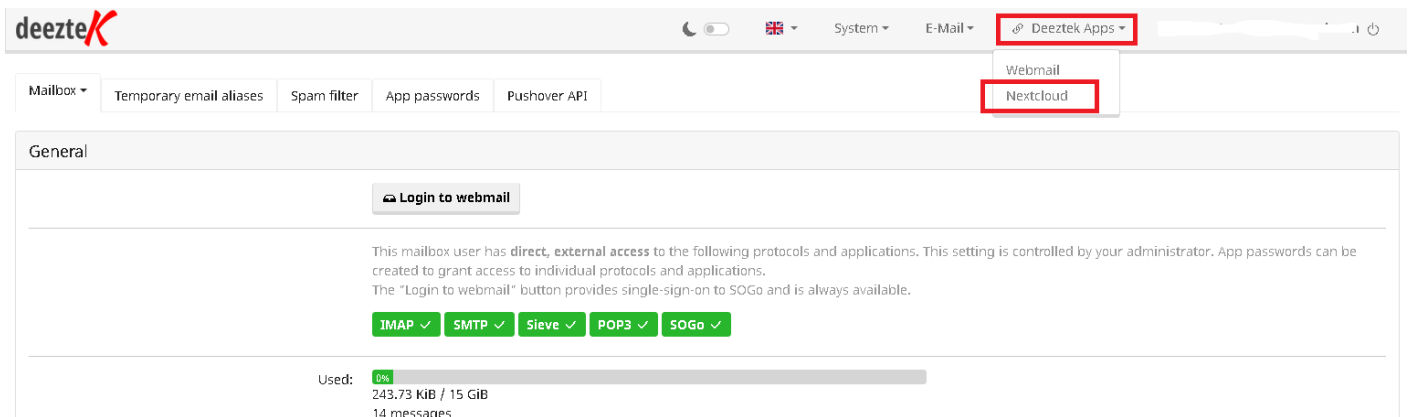

Figure 1

The screenshot displays the Deeztek Mail UI login page. At the top, there is a 'Login' header and a moon icon with a toggle switch. The Deeztek logo is prominently displayed in the center. Below the logo, the text 'Deeztek Mail UI' is visible. The login form consists of two input fields: an email field containing 'someone@domain.tld' and a password field with masked characters. Both fields are enclosed in a red rectangular box. Below the password field, there are two green buttons: 'Login' and 'FIDO2/WebAuthn Login'. The 'Login' button is also highlighted with a red box. To the right of these buttons is a language selection dropdown menu showing the UK flag. Below the login buttons, there is a link '> Forgot Password?'. Further down, there is a section for 'Deeztek Apps' with a link icon. At the bottom of the page, there are two blue buttons: 'Webmail' and 'Nextcloud'. Finally, at the very bottom, there is a link '? Show/Hide help panel'.

- Once logged in, click the **Deeztek Apps** button on the upper-right corner and on the resultant menu, click on **Nextcloud** (Figure 2).

Figure 2

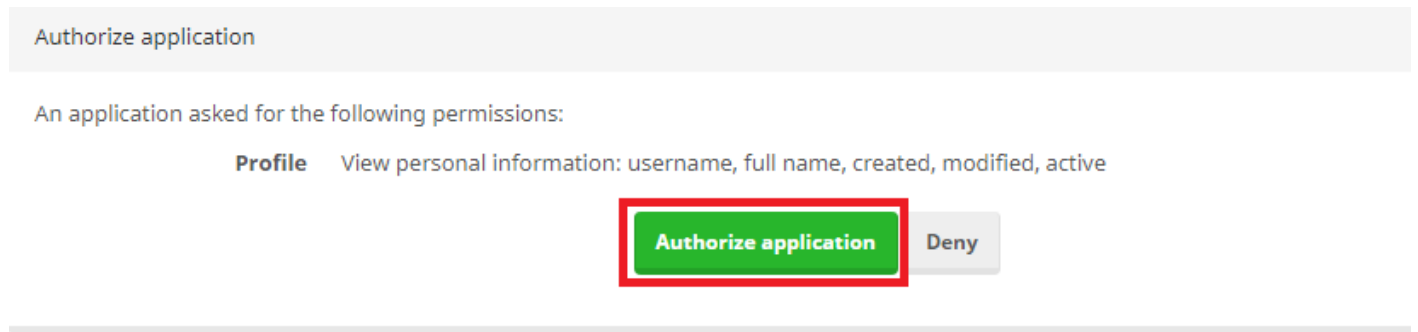

- On the **Login to Deeztek Cloud** screen, click on the **Login with Deeztek Mail Account** button (Figure 3):

Figure 3

- On the **Authorize application** screen, click the **Authorize application** button (Figure 4):

Figure 4

- You should now be logged in to Deeztek Cloud.
